English Proficient

I am a responsible, motivated, and team-oriented frontend developer. I strive to complete tasks and projects with accuracy and dedication until they reach their desired outcome. I believe effective teamwork plays a key role in the success of any project. Committed to personal and professional growth, I continuously seek opportunities to improve my technical skills.

Work Experience

◇ **Telegram Mini App (Fullstack)**

Developed both the frontend and backend for a web-based Telegram Mini App focused on speed, simplicity, and easy access to services.

- **Frontend:** Built with Next.js using dynamic and responsive UI components
- **Backend:** Node.js and Express.js for handling API logic and Telegram integration
- **Features:** Clean UI/UX, optimized loading, fast navigation

◇ **Office Automation System (Frontend)**

Implemented the frontend of an office automation platform aimed at simplifying organizational workflows and enhancing the user experience.

- Developed interactive dashboards, smart forms, and data displays
- Built with modern frontend frameworks, focusing on responsiveness and maintainability

◇ **E-commerce Platform (Fullstack)**

Contributed to the development of a complete online store platform with a user-friendly and responsive design.

- **Frontend:** Next.js and Ant Design
- **Backend:** Node.js for handling products, orders, and payments
- Features include product pages, filtering system, shopping cart, and checkout flow

◇ **Appointment Booking App (Fullstack)**

Created a user-friendly appointment scheduling system with easy access to various service providers.

- Built using **Next.js**, **Node.js**, and **Ant Design**
- Focused on accessibility, speed, and simplified navigation for booking

◇ **B2B Website (Frontend)**

Developed the frontend of a B2B platform designed for business-to-business interactions and services.

- Built with **Next.js** and **Ant Design**, emphasizing a clean and professional interface
- Optimized for performance and scalability
